Clear Creek Amana Community School District Personalized Learning Plan

Student		
Advisor		7-

One of the goals of the Clear Creek Amana Community School District is to personalize the educational experience for each student. It is our belief that when the school forms a partnership with the student and family, we together can create the best learning environment for our students. As you will see below, our Personalized Learning Plan focuses on three overarching goals; learning to learn, learning to do, and learning to be. It is our belief that by valuing all three areas our students will have a more complete and fulfilling education, and hopefully a more fulfilling life.

Clear Creek Amana Middle School Mission Statement for Grading

At Clear Creek Amana Middle School we strive to ensure that the letter grade a student achieves is based on true assessments and that the grade represents learning.

Clear Creek Amana Middle School Grading Principles

- 1. Differentiation of instruction is essential in order for students to grow and progress.
- 2. We value our students' attendance, behavior, cooperation, motivation, and positive attitude.
- 3. Grades will be based on what the student is able to show they have learned. Therefore, extra credit will not be given at any time.
- 4. Retakes and revisions of assessments are allowed.
- Students will be allowed multiple opportunities to demonstrate proficiency in various ways.
 When proficiency is demonstrated, students will be given the opportunity to extend their learning.
- 6. Students are expected to complete all assigned work.
- 7. There will be times that students are expected to do practice work outside of the school day.
- 8. Independent practice will be meaningful, purposeful, of high quality and aligned with learning goals.
- 9. Teachers will determine proficiency by considering multiple points of data using the most recent data and provide evidence to support their determination.
- 10. Students will have multiple opportunities for practice before the learning goals are assessed for a proficiency score.

What is a learning goal?

A learning goal is the foundation for all of our lessons and assessments. The learning goals should match our lowa Core Standards.

Example learning goal from social studies: *The students will understand how physical processes and human actions modify the environment and how the environment affects humans.*

What is Success Criteria?

The success criteria should be observable and/or measurable. Success criteria are what the students are asked to show their ability to do. Normally success criteria are written using "I can" statements. Example success criteria from social studies: I can describe how the physical features of Australia impact population density.

What is a rubric?

A rubric is a scoring tool that lists the criteria for a piece of work. For example, a rubric for an essay might tell students that their work will be judged on purpose, organization, details, voice, and mechanics. A good rubric also describes levels of quality for each of the criteria, usually on a point scale.

What is differentiated instruction?

Differentiated instruction is what teachers do to meet the needs of diverse learners.

Personal Learning Plan Help Document

MAP Test Information

What is a RIT score?

RIT is a unit of measure that uses individual item difficulty values to estimate student achievement. RIT scores create an equal-interval scale. This means the difference between scores is the same regardless of whether a student is at the top, bottom, or middle of the RIT scale, and it has the same meaning regardless of grade level. The RIT scale is used to measure how "tall" a student is on the curriculum scale and scores can be compared to tell how much growth a student has made, similar to measuring height on a yardstick.

How are MAP goals set?

The student's spring MAP goal is based on the fall test and the number of instructional weeks the students will have between the fall and spring tests.

Iowa Tests of Basic Skills/Iowa Assessment Information

What does NPR mean?

NPR stands for National Percentile Rank. A student's percentile rank is a score that tells the percent of students in a particular group that got lower raw scores on a test than the student did. It shows the student's relative position or rank in a group of students who are in the same grade and who were tested at the same time of year (fall, midyear, or spring) as the student. Thus, for example, if Toni earned a percentile rank of 72 on the Language test, it means that she scored higher than 72 percent of the students in the group with which she is being compared. Of course, it also means that 28 percent of the group scored higher than Toni. Percentile ranks range from 1 to 99.

How do we know if a student is considered proficient?

If a student scores at the 41st NPR or higher they are considered proficient.

When will our students be taking the Iowa Assessment this year?
Clear Creek Amana students will begin taking the Iowa Assessment on October 17, 2011.

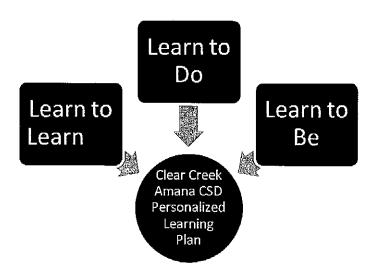

What parts of the lowa Assessment will our students take this year?

This year our students will take the full battery of tests for the lowa Assessment. The test parts include; reading, written expression, math, science, social studies, vocabulary, spelling, capitalization, punctuation, and computation.

What work or volunteering have you	Do you work hard to relearn the learning goals		
Do you know what the learning goals for your classes are? Do you use study guides to review? Do you study outside of class to prepare for assessments? If the student is struggling academically, suggest to the student and family that the student stay after school on Wednesday afternoons from 1:30-3:00 for extra support. (If the student is going to start staying after school please email Mr. Carey.) Part 3, Learn to Do (career/vocational) What career would you like to learn more about? What work or volunteering have you	when necessary?
